## Camfil adds 51st country to its global operations

Camfil – September 2, 2019

Camfil has added Sri Lanka to its global operations, the 51st country that the air filtration expert now has representatives in.

Camfil's MD for India, Shashi Shekhar recently visited Sri Lanka to meet with potential customers. He said: "Sri Lanka is a great addition to our business, with opportunities across a range of sectors, including manufacturing,

hospitals, warehousing, waste treatment and data centres. Manufacturing in particular is a growing part of Sri Lanka's economy where good air quality is essential to keep workers safe and processes clean and efficient. This is a new milestone in our strategic business plan. Camfil's endeavour in Sri Lanka will certainly help grow the overall business and promote Camfil's noble vision of making clean air a human right in yet another country."

During the visit, the Camfil team presented the need for clean air and the air filtration solutions offered, covering comfort, clean processes, Indoor Air Quality, Molecular Contamination Control and Air Pollution Control.

Local distributor, Industrial Safety Equipment Co. (Pvt) Ltd. (ISEC), based out of Colombo, Sri Lanka's capital, will provide a point of contact to customers, delivering Camfil's products and services to the region. The Camfil sales function will be handled by its India-based team.

You can contact the local distributor here:

M/S Industrial Safety Equipment Co.(Pvt) Ltd.

No 03, Nawala Road, Rajagiriya

---

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative

design, precise process control and a strong customer focus we aim to conserve more, use less and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 30 manufacturing sites, six R&D centres, local sales offices in 26 countries, and 4,480 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes and the environment, visit us at [www.camfil.com](http://www.camfil.com).
