

New Camfil Australia office located in Melbourne

May 24, 2024 15:54 CEST

Camfil Australia Head Office Relocates to a New, Larger Facility to Support Strategic Growth Initiatives

Camfil Australia is excited to announce the relocation of its Head Office to a larger, more modern office space as part of the company's strategic growth plan. The new facility, encompassing an impressive 4,655 square meters, is ideally situated off the Dandenong Bypass in Melbourne, providing enhanced convenience and accessibility for both employees and clients.

This move to a larger office space reflects Camfil Australia's commitment to supporting its expanding team. The new headquarters not only offers a more

spacious and conducive work environment for employees but also demonstrates the company's dedication to meeting growing customer demand with twice the warehouse space.

A standout feature of the new office is the integration of Camfil's own energy-efficient, advanced air filtration systems. These systems are designed to ensure clean air and optimal working conditions for all employees, aligning with Camfil's core values of sustainability and employee well-being. Jonathan Bunge, Managing Director of Camfil Australia, expressed his enthusiasm about the relocation: "We are thrilled to unveil our new headquarters, a testament to our commitment to our customers and to provide a conducive work environment for our team. This relocation marks a significant milestone in our journey towards continued success and innovation." The new office will also clearly follow the guidelines of Camfil's Chief Aironomics Officer (CAO) initiative, with a dedicated CAO in place to monitor the quality of the Indoor Air for employees.

To commemorate this momentous occasion, Camfil Australia hosted a special ribbon-cutting ceremony attended by distinguished guests, including Mayor Cr Lana Formoso of the Greater Dandenong City Council, and Mark Simmons, CEO of Camfil. In her speech, Mayor Lana Formoso emphasized the critical role that clean air and water play in enhancing the overall quality of life for individuals in the community. She highlighted how access to clean air and water is essential for maintaining good health, and promoting sustainable living.

The inauguration of the new headquarters signifies the beginning of a new chapter in Camfil Australia's journey of growth and success.
