Camfil donates air purifiers to the community to Pertini Culture Center in Italy - protecting people, and the environment

Stockholm, Sweden, 15th June 2021 - Camfil Italy in Cinisello Balsamo donated air purifiers to the municipality for the Il Pertini Cultural Center. It is regarded as a gesture of generosity and attention to the city from Camfil that has been operating in the area for the last 46 years. The air purifiers have been placed in the study room in one of the buildings, which has become an important step as many young students and professionals spend hours

studying there.

Following an inspection, Camfil proposed the installation of 3 air purifiers in the study room. The clean air solutions, capable of purifying the air from pollen, bacteria, viruses, particulate matter, ozone, chemicals, and other harmful contaminants, are also the same adopted by the French and Spanish regional authorities in the canteens, laboratories, and study rooms of their schools. Silent and with very low energy consumption, the City M air purification systems will guarantee about 16 changes per day of purified air thanks to HEPA H14 filters, with a certified filtration efficiency of 99.995% even on the smallest particles in the air.

"We are humbled to have donated three air purifiers to the reading room of the Pertini Cultural Center which plays a central role in promoting culture, socialization, and creativity in the Cinisello Balsamo community. It is an important contribution as the local communities and public places have remained under strict restrictions due to the pandemic. Our clean air solutions ensure a healthy and safe indoor environment." - Luciano Rogato, Managing Director of Camfil Italy.

"I thank Camfil for this donation to our city library which is a hub for so many young people for studying, reading, and as a meeting place. Due to the health emergency, which is still ongoing, the Pertini was closed for some time and we know how much discomfort this has created for many students and young professionals. The installation of these machines will allow more comfortable and healthy use of the indoor environments." - Mayor Giacomo Ghilardi commented on the Camfil initiative.

"Thank you for this gesture of consideration and enhancement of the symbolic place of the cultural center in the city: Il Pertini. Our library is visited daily by many people of all ages. The liveability of the rooms is very important and the installation of these air purifiers will certainly improve their visit. We have become aware of this especially now that the pandemic has forced the facility to prohibit or restrict entrances to safeguard health," said the Councilor for Culture, Daniela Maggi.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to conserve more, use less, and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 33 manufacturing sites, six R&D centres, local sales offices in 30 countries, and 4,800 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world.
