Camfil is now  
**CPD Accredited**  
Training Provider

Mar 09, 2021 09:24 CET

## Camfil is now CPD accredited training provider for air quality standards related to food safety and compliance

Stockholm, Sweden, 9th March, 2021 - Camfil has obtained the CPD standards registered training provider accreditation for the 'BRCGS Air Quality Standards and Application Training'. This course is particularly useful for our food & beverage segment customers as it will give useful insights on topics such as the impact of air quality on production, product contamination, employees health, odour emissions, product shelf life, and operational costs. BRCGS Standards have harmonized Food Safety Standards across the world and are simple and effective to use. It is crucial to understand and have your food production facility evaluated to ensure compliance with the standard.

*“This certification emphasises Camfil’s commitment for improving Air Quality & Food Safety while continuing to work with key Food & Beverage stakeholders and Global Standards organizations.” – Ross Dumigan, Food and Beverage Segment Manager, Camfil*

Camfil is at the forefront in the F&B market and recognizes the challenges faced by the manufacturers due to limited knowledge and understanding of the role air filtration plays in their process. Outdoor air enters a building through an HVAC system and if untreated can result in contamination which could result in product call back, brand damage, and reduction in consumer confidence. Our air filtration experts can help you set standards and protect your people, process, and the environment. We will share our expertise in this training which is developed by our global air filtration experts and can help you categorize the risk in your food & beverage business. We have developed air filters for general ventilation applications that are ISO 16890 rated and comply with Eurovent standards. Camfil also has a dedicated product range "ProSafe" which consists of certified products safe for use in food & beverage applications.

Our new CPD accredited training course will help customers in the food & beverage industry understand the air quality requirements and air filter specifications in various food production & handling environments. Camfil also has CPD certified training on HEPA filtration and workplace remediation – protecting your work environment from the spread of virus. Contact your nearest Camfil office to be part of our training program.

In the infographic, Camfil experts explain how food is segmented based on its characteristics and how air quality or air care is determined which is part of the course.

---

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That’s why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the

world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to conserve more, use less, and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 33 manufacturing sites, six R&D centres, local sales offices in 30 countries, and 4,800 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world.
