Camfil Middle East wins prestigious Manufacturer of the Year (Air Treatment) trophy at Climate Control Awards 2021

Stockholm, Sweden, 07th October 2021: Camfil Middle East has won the Manufacturer/Supplier of the Year (Air Treatment) at the 11th annual Climate Control Awards, held on 14th September in Dubai, UAE. This year, the dominant business sentiment revolves around the fight against the pandemic and the challenging environment. The other focus points remain sustainability in business, good indoor air quality, protecting the environment, and ensuring safety. Another crucial aspect of consideration for the Awards Committee – including the jury and the third-party auditing firm, which monitored the evaluation of submissions – was, "To what extent is the

HVACR industry serving the regional and global communities in mitigating the climate crisis and in safeguarding the built- environment?"

The Award is one of the most prestigious in the industry, and Camfil won in this category while contesting with several other HVACR manufacturers in the region.

At Camfil, we feel most humbled and honoured to receive this award and thank all the jury members, customers, and suppliers for their constant support and encouragement. We believe our mission to make clean air a human right, served at the essence along with the passion to fight bad indoor air, and to protect people, processes, and the environment. Camfil's team around the globe actively worked with companies in various sectors to ensure clean air, health, and safety with state-of-the-art air filtration solutions.

"This last year was very challenging, due to the impact of COVID-19 on the entire supply chain. We had to ensure that our critical customers (Hospitals, Power Plants, Pharmaceutical Laboratories, Food and Beverage Facilities) would not face any shutdown related to air filter replacement. Most importantly, our filtration solutions helped our customers to mitigate the risk of COVID-19 in many healthcare facilities and ensured that people can get back to work safely. As a responsible supplier of air filters, we reached out to many customers through webinars and educated them on the critical need for air filtration. We are today honoured to be recognized as Manufacturer/Supplier of the year in the Air Treatment category and we send our warmest thanks to the CPI Jury members." – Stéphane Ruiz, Managing Director, Middle East

Sustainability at Camfil

Sustainability has been part of the Camfil business since our foundation in 1963. [Learn more about our sustainability efforts and strategies](#). For more than half a century, we've helped people breathe cleaner air. We are convinced, together with our customers, employees, and stakeholders, we can shape a truly sustainable future.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to conserve more, use less, and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 33 manufacturing sites, six R&D centres, local sales offices in 30 countries, and 4,800 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world.
