Camfil Unveils the Opakfil ES+: Enhanced Design, Enhanced performance

Stockholm, Sweden – February 4, 2025 – Camfil, a global leader in clean air solutions, is proud to announce the launch of the Opakfil ES+, the latest innovation in compact V-Bank air filters. Designed to meet the growing demand for energy-efficient and sustainable HVAC solutions, the Opakfil ES+ offers superior performance, extended operational life, and significant environmental benefits.

Building upon the success of the original Opakfil ES, the Opakfil ES+ features an increased filter depth, resulting in a larger amount of filtration media. This enhancement leads to a higher dust holding capacity, allowing the filter to last up to 50% longer in HVAC systems. The extended lifespan not only

reduces maintenance frequency but also minimises waste and labor costs, contributing to a lower total cost of ownership.

Energy efficiency is at the core of the Opakfil ES+ design. The filter achieves a 62% reduction in energy consumption compared to the industry average and a 24% reduction compared to other A/A+ rated compact filters. This remarkable performance is attributed to its low pressure drop and aerodynamic radial design, which optimise airflow and reduce energy usage.

The Opakfil ES+ is available in ePM1 and ePM2.5 efficiencies, in accordance with ISO 16890 standards, ensuring high indoor air quality across various applications. Its moulded frame, constructed from recycled plastic, underscores Camfil's commitment to sustainable manufacturing practices.

"The Opakfil ES+ represents a significant advancement in the performance of Compact HVAC filters," said Arcangel Minguez, EMEA Product Manager at Camfil. "By enhancing the filter's depth and media capacity, we've created a product that not only delivers superior performance but also aligns with our customers' sustainability goals by reducing energy consumption and waste."

Ideal for HVAC systems in commercial and industrial buildings, the Opakfil ES+ supports organisations striving for a more sustainable future. With its combination of extended filter life, exceptional energy efficiency, and robust construction, the Opakfil ES+ sets a new benchmark in the air filtration industry.

For more information about the Opakfil ES+ and how it can benefit your facility, please visit <https://www.camfil.com/en/campaigns/opakfil-es-plus/>.

The Camfil Group is headquartered in Stockholm, Sweden, and has **30** manufacturing sites, six R&D centres, local sales offices in **35+** countries, and **5,700** employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes, and the environment, visit us at www.camfil.com.
