

CAMFILCAIRING WEEK 2023

WELLBEING

FOR A SUCCESSFUL BUSINESS

Camfil Caring Week 2023 focused on indoor air quality for employee health and wellbeing in the workplace.

May 08, 2023 10:00 CEST

CamfilCairing Week 2023 – Wellbeing for a Sustainable Business

Stockholm, Sweden 8 May 2023 – Since day one, Camfil has been all about clean indoor air for the well-being and health of people and the planet – our vision in fact is to make clean air a human right. We lead as specialists in the clean air solutions industry globally. Therefore it is natural that recently in 35 locations globally, the organisation focused on a key component of health and wellbeing as part of the annual Camfil *Cairing* Week 2023.

The theme 'Wellbeing for a Successful Business' saw Camfil employees engaged in well-being, indoor clean quality and sustainability activities.

These focused on physical health and overall well-being in the workplace. “Wellbeing challenges” included adopting an indoor air quality (IAQ) friendly plant; encouraging practices such as drinking more water; performing a random act of kindness; and an update on indoor air quality by the Airgonomics Officer (AO) in each office.

Chief Airgonomics Officer (CAO): Be the voice of clean air!

The Chief Airgonomics Officer (CAO) is an indoor air quality advocacy programme at Camfil. Part of the company’s corporate and sustainability efforts, it promotes well-being in the workplace. It is a known fact that health and overall well-being contribute to work performance, increased productivity and even reduces absenteeism. Over 100 Airgonomics Officers monitor indoor air quality with over 200 sensors via a real-time IAQ dashboard.

In leading the CAO programme at Camfil Alain Bérard, President of Global Sales and Marketing at Camfil encourages all to live out the organisation’s values and DNA to walk the talk on indoor air quality at Camfil. During Camfil Caring Week it became evident that indoor air has a voice and there are people accountable for indoor air. The Camfil Airgonomics Officers ensure IAQ for colleagues in the workplace so all can perform at their best, which in turn contributes to long-term benefits for all.

Alain Bérard, the world’s first Chief Airgonomics Officer led *The Airgonomics Lab* session, a monthly forum where Airgonomics Officers can share more technical know-how and practical approaches to maintaining IAQ. All Airgonomics officers have a toolkit of materials, guides, equipment and even a new training programme, *Airgonomics 101*.

Camfil believes a successful and sustainable business is one that prioritises the health and wellbeing of its employees. Camfil remains committed to its mission of creating a cleaner, healthier, and more sustainable future for people, processes and the environment and – to make clean air a human right.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimise energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to conserve more, use less, and find better ways – so we can all breathe easier. The Camfil Group is headquartered in Stockholm, Sweden, and has 30 manufacturing sites, six R&D centres, local sales offices in 35 countries, and 5600 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world.
