United to create healthier, more productive indoor environment

Stockholm, Sweden, 3 May 2022 – **Camfil is proud to be one of the founders of the newly formed Healthy Indoors Alliance. The partners of the alliance all share the ambition to raise awareness around the vital importance of a healthy and sustainable indoor environment.**

Today, we spend 90 percent of our time indoors, at work, play and home. For this reason, it's high time we take a serious look at our indoor environments, in order to understand their effects on our wellbeing and productivity, and to make beneficiary changes where necessary.

While it's true that some standards and regulations exist to guide property owners, specifiers, builders and employers, it is also true that such measures often fall short, not providing the solid basis necessary to create the healthy, productive indoor spaces we need.

For this reason, the four companies Camfil, Condair, Fagerhult and Swegon decided it was time to act. Together, we have teamed up to establish Healthy Indoors Alliance, a joint initiative to improve the healthfulness, productivity and comfort of the people in commercial, public and residential buildings. 'We find that despite vast scientific evidence, both businesses and consumers know very little about the tremendous impact the indoor climate has on our health and productivity', says Silvia Petroni, Head of Strategic Marketing, Condair Group.

The initiative currently features contributors from businesses within ventilation, indoor climate control, lighting, humidification, and filtration. We address the public, developers, trades, professionals, industry, science, and government institutions with the aim to educate, inform and raise awareness.

The Healthy Indoors website, www.healthyindoors.eu, features comprehensive information vital to understanding how we can create sustainable, healthy indoor environments. It clears up questions and misunderstandings and provides guidance for practical actions. The benefits are huge, including reduced illness, sick leave, and fatigue, as well as generating greater comfort and overall wellbeing.

'Seeing people increasingly struggle with allergies and other health concerns attributable to their indoor environments, we thought it was time to explain and show how easy it is to remedy the situations,' says Mikael Börjesson, Competence Director, Swegon Group.

The Healthy Indoors Alliance wants to drive change and make it easy for everyone to take action to improve the indoor spaces in which we spend so much of our time.

Summary:

The four companies Camfil, Condair, Fagerhult and Swegon have teamed up to establish Healthy Indoors Alliance, a joint initiative to improve the

healthfulness, productivity and comfort of the people in commercial, public and residential buildings. The website, www.healthyindoors.eu, features comprehensive information vital to understanding how we can create sustainable, healthy indoors.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That's why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to conserve more, use less, and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 31 manufacturing sites, six R&D centres, local sales offices in 35 countries, and 5,200 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes, and the environment, visit us at www.camfil.com.
