Made in Australia: Camfil invests in new manufacturing line in Sydney's west, delivering locally made pre-filters to Australian customers

Stockholm, Sweden, 14 October 2022 – Camfil Australia's new pre-filter manufacturing line is now up and running. Located in the Rydalmere facility in Sydney's west, the new manufacturing line means quicker turnaround of orders and less stock outages for Australian customers.

John Mediati, Commercial and Product Manager at Camfil Australia explains, “With all the upheaval in world trade recently, we are happy to say Camfil also now offers products that are made in Australia. This step was driven by our customer-focused approach to unbeatable service.”

“Camfil’s investment in the installation of a full pre-filter line provides customers with peace of mind that they can get what they want, when they want it,” says Mr. Mediati, “thereby eliminating the erratic service levels that are generally being experienced throughout the Australian filter market.”

The A\$200 thousand investment commenced with the production of Camfil’s 30/30 pleated panel filters but in time will expand to include other models in the range, such as the Aeropleat III, AP-Eleven and AP-Thirteen. The investment has also created a number of new job opportunities, with team members dedicated to operating the new pleating line.

The locally made filter products will be easily identifiable, proudly displaying ‘Made in Australia’ labelling and certified to Underwriters Laboratories (UL) Standards.

For more than half a century, Camfil has been helping people breathe cleaner air. As a leading manufacturer of premium clean air solutions, we provide commercial and industrial systems for air filtration and air pollution control that improve worker and equipment productivity, minimize energy use, and benefit human health and the environment. We firmly believe that the best solutions for our customers are the best solutions for our planet, too. That’s why every step of the way – from design to delivery and across the product life cycle – we consider the impact of what we do on people and on the world around us. Through a fresh approach to problem-solving, innovative design, precise process control, and a strong customer focus we aim to

conserve more, use less, and find better ways – so we can all breathe easier.

The Camfil Group is headquartered in Stockholm, Sweden, and has 31 manufacturing sites, six R&D centres, local sales offices in 35 countries, and 5,200 employees and growing. We proudly serve and support customers in a wide variety of industries and in communities across the world. To discover how Camfil can help you to protect people, processes, and the environment, visit us at www.camfil.com.
